

# From Idea to First Oil

Onterra develops and facilitates marginal field acquisition and production in Nigeria, taking a field from purchase to flowing barrels with the people, partners and full understanding of the system to deliver.

## THE JOURNEY WE MANAGE

### CAPITAL TO FIRST OIL

|                                |         |
|--------------------------------|---------|
| License & acquisition          | \$8.5m  |
| 3D seismic & subsurface        | \$1.5m  |
| Drilling & completion (1 well) | \$10.0m |
| Topsides / facilities          | \$10.0m |
| Evacuation / export            | \$7.0m  |
| Engineering, PM & owner's      | \$4.0m  |
| Pre-first-oil G&A              | \$3.0m  |
| Contingency                    | \$6.0m  |

**TOTAL** **\$50.0m**

### THE ASSET & STRUCTURE

|                  |                               |
|------------------|-------------------------------|
| Peak production  | 3,000 bopd                    |
| Life average     | ~2,400 bopd                   |
| Recoverable      | ~20 mmbbl                     |
| Field life       | 23 years                      |
| Oil price (base) | \$75 / bbl                    |
| Fiscal           | PIA 2021 (royalty + HT + CIT) |

Recovery 80/20, then 60/40 in the investor's favour

## INVESTOR RETURNS (base case, \$75/bbl)

|                         |                               |                    |                          |
|-------------------------|-------------------------------|--------------------|--------------------------|
| <b>4 yrs</b><br>payback | <b>4.3x</b><br>money multiple | <b>~25%</b><br>IRR | <b>\$42m</b><br>NPV @10% |
|-------------------------|-------------------------------|--------------------|--------------------------|

**Upside:** each additional well (\$7m onshore to \$15m offshore) lifts production and returns; a 3-4 well programme drains the field optimally and is modelled in a client-specific deep-dive on request.
